

This book, originally submitted as a Masters thesis, outlines the authors approach to handling a specialised translation assignment and provides useful insights to translation students and practitioners alike. Based on the authors own translation of an original peer-reviewed psychological research article from Spanish into English, it discusses relevant practical, technical, and linguistic issues frequently encountered by specialised professional translators in their everyday work, and illustrates how theoretical approaches to translation - most notably Skopos theory and other functionalist-pragmatic approaches - can help translators make appropriate and well-founded translation decisions.

Mary Queen of Scots..., The Principalship: Vision to Action, What Christianity Means to Me; a Spiritual Autobiography, Mif ob idealnom muzhchine: Roman, Rheinisch-Westfalische Akademie der Wissenschaften: Natur-, Ingenieur- und Wirtschaftswissenschaften Vortrage · N 347 (German Edition), Yankee Doodle Boychik Grows Up,
