

Excerpt from Woods Bible Animals: A Description of the Habits, Structure, and Uses of Every Living Creature Mentioned in the Scriptures, From the Ape to the Coral The author of Bible Animals has long been known in England and America as a learned and accurate as well as popular writer in various departments of natural history. He has the happy faculty of making the results of dry scientific study and painstaking observation interesting and instructive to all classes of readers. He throws himself into his work with that quiet and genial enthusiasm which awakens sympathy and inspires confidence. He does not mingle so much of romance with sober reality as to leave little distinction between the facts of science and the pleasantries of fiction; nor is he so tied to detail and definition that the reader gets nothing but the bare skeleton when he would see the grace and action of the living body. Mr. Wood writes about birds and beasts as if he knew them and liked them, and so he makes his readers like them too. He speaks so truly and kindly of his dumb friends and companions of the fields and woods that they would certainly vote him many thanks if they had learned our habit of meeting in public assembly and repaying our benefactors with resolutions. In the present work - a new and enlarged edition of which is now offered to the American public - the author has brought out all the resources of his mature and cultivated powers. It has been the more congenial to him, and he has made it the more interesting to others, because the subject touches more closely upon the line of his sacred convictions and his professional studies. In his vivid representations he makes ministers and missionaries of the birds of the air, the beasts of the field and the fish of the sea. He shows how closely the Bible is in harmony with the great work of creation which in the beginning was pronounced very good. He gives the habits and the history of every living creature named in the sacred Scriptures, and he makes the whole world of animated nature stand forth to interpret and to adorn the divine word. In this work the Bible is made to appear not as a dry treatise or a dull compound of theories and propositions, but as a living book, thoroughly in sympathy with all the interests and occupations of the living world.
