

Studies in Syntactic Typology (Typological Studies in Language)

The papers in this volume are revised versions of presentations at the conference on Language Universals and Language Typology in March 1985 at the University of Wisconsin, Milwaukee. They include new proposals of universals, results of investigations to validate or refine previously proposed universal generalizations, and discussions concerning the explanation of universals. The volume will be of great interest to researchers in syntax and in language universals. In addition, scholars in pragmatics, philosophy of linguistics, psycholinguistics, anthropological linguistics and semantics will also find articles of interest in the book.
