

The Fictional Woman

Tara Moss has worn many labels in her time, including author, model, gold-digger, commentator, inspiration, dumb blonde, feminist, and mother, among many others. Now, in her first work of non-fiction, she blends memoir and social analysis to examine the common fictions about women. She traces key moments in her life?from small-town tomboy in Canada, to international fashion model in the 90s, to bestselling author taking a polygraph test in 2002 to prove she writes her own work?and weaves her own experiences into a broader look at everyday sexism and issues surrounding the underrepresentation of women, modern motherhood, body image, and the portrayal of women in politics, entertainment, advertising, and the media. Deeply personal and revealing, this is more than just Tara Moss's own story. At once insightful, challenging, and entertaining, she asks how we can change the old fictions, one woman at a time.
