

The creation of a culture of Judicial Independence is of a central significance both in national domestic legal systems, as well as for the international courts and tribunals. The main aim of this volume is to analyze the development of a culture of Judicial Independence in comparative perspectives, to offer an examination of the conceptual foundations of the principle of judicial independence and to discuss in detail the practical challenges facing judiciaries in different jurisdictions. The proposed volume is based on the papers presented at the five conferences held in the framework of The International Project on Judicial independence. The editors of this volume and the contributors to it are leading scholars and distinguished experts on judicial independence and judiciaries.
