

Still Waters (DCI Mark Lapslie, Bk 1)

When the badly decayed body of an elderly woman is unearthed, Detective Chief Inspector Mark Lapslie and his sergeant, Emma Bradbury, are called in on the case. The body provides only two mysterious clues to the identity of the murderer: someone with a deadly knowledge of household plants used shears to clip the fingertips off the corpses right hand. But this dearth of evidence is not Lapslies only problem. Hes just returned to the force after a year of relative isolation, trying to avoid the worst symptoms of his synasethsia, a neurological condition that causes him to taste sound and that makes his life as complicated as any crime hes been charged with solving. Now hes flooded again--not only with the convolution of senses that can drive him nearly mad but also with the increasing convolutions of the case. The murder appears to be the work of a serial killer, and the investigation is leading in a direction that could be extremely detrimental to Lapslies career--if not to his very life.Razor-sharp, viscerally descriptive, mesmerizingly eerie and entertaining--and with one of the most clever, ruthless, and sympathetic villains to appear in ages--Still Waters is a stunning start to an exciting new series.
